

- **Sample production for free**
- Material development and test purposes
- Series production
- Equipment and tailored support at flexible rates to meet your unique requirements
- **Online presentation:** Benefits of producing Composite Materials with a HELD Double Belt Press

**Interested?** Contact us: [sales@held-tech.de](mailto:sales@held-tech.de)

## TEST RUNS & SAMPLE PRODUCTION

Test your material or fabricate samples while evaluating the market.

Develop and optimise new materials in our facility.

Benefit from calculable prices without risk.

## SERIES MANUFACTURING

Is your product fully prepared for the market and is there a high demand for it? You currently won't invest in your own machine? Are you in the product ramp-up phase with inaccurate forecasts?

Rent our Double Belt Press!

## EQUIPMENT

- Unwinding and rewinding equipment for processing multiple layers in the DBP
- Material can be trimmed and cut to variable length
- Roll to roll/sheet and sheet to roll/sheet, granulate to sheet/role production

## KEY FACTS

- Raw material width up to 1575 mm / 62 inch
- Isobaric pressure up to 80 bar / 1160 psi
- Process temperature up to 400 °C / 752 °F
- Speed up to 30 m / minute
- Cooling under maintained pressure
